

## **SEGMENTATION of STOP TB PARTNERS**

# TABLE OF CONTENTS

- Process of segmentation
- General overview of all Stop TB Partners
- Analysis of 4 major constituencies:
  - Developed country NGOs
  - Developing country NGOs
  - Private sector
  - Technical agencies
- Analysis of smallest constituency:
  - Communities

# PURPOSE AND PROCESS OF SEGMENTATION

- The Operational Strategy of the Stop TB Partnership Secretariat 2013-2015 mandates the Secretariat to segment the partner landscape utilizing the information available in the Directory of Stop TB Partners. **The purpose is to strengthen the understanding of the TB partner landscape and provide a basis to identify most effective ways to sustain and expand partner engagement.**
- The segmentation of partners was conducted in September 2013. At this time the organizations registered in the Directory of Stop TB Partners were 1079.
- The Directory of Stop TB Partners is a web-based repository of partners' information ([www.stoptb.org/partners](http://www.stoptb.org/partners)). Each partner has the responsibility to keep up to date its online profile. The main information collected in the Stop TB Directory relate to:
  - **Constituencies:** Partner organizations are attributed by the Secretariat a constituency based on the type of organization. Constituencies are: developing country NGO, developed country NGO, communities, private sector, technical agencies, countries, donors, foundations, multilaterals.
  - **Regional distribution:** Partner organizations can select one country in which their headquarters is based. This country belongs to one of the six WHO regions: African, American, Eastern Mediterranean, European, South East Asian, Western Pacific.
  - **Specializations:** Partner organizations can select one, two or more specializations depending on their constituency, size and scope. There are six types of specialization: Advocacy, Communication, Social Mobilization & Community Engagement; Delivery of Health Services & Care; Funding; Provision of Drugs, Diagnostics & Commodities; Research & Development and Technical Assistance.
  - **Contributions to the Global Plan:** Partner organizations can select one, two or more ways they contribute to the Global Plan depending on their scope and dimension. There are nine methods of contribution: DOTS Expansion & Enhancement, Drug-Resistant TB, Fundamental Research, Laboratory Strengthening, New Diagnostics, New TB Drugs, New TB Vaccines, Operational Research and TB/HIV.
  - **Reasons for joining:** Partner organization can select one among six reasons for joining the Stop TB Partnership. Partners make reference to: Information on Developments in the TB World, Involvement in Stop TB Working Groups & other Initiatives, Network with other Partners, Resource Mobilization or Technical Assistance & Advice.
- The segmentation was conducted by constituency and each constituency was analyzed by regional distribution, specialization, contribution to the Global Plan and reason for joining. Only the four major and the smallest constituency were analysed in detail for the purpose of this exercise.

# GENERAL OVERVIEW of all STOP TB PARTNERS

## MAIN HIGHLIGHTS

### Constituencies and geographical distribution

- ≈ 75% of partners are NGOs (with headquarters in developing and developed countries); private sector account for 7% and communities for 2%.
- Most organizations are headquartered in AFRO (37%) and SEARO (24%) regions; only 3.2% in WPRO region.

### Specialization

- Partners are mainly involved in advocacy, communication, social mobilization and community engagement (30%) and delivery of health services and care (21%).
- Partners are working less in provision of funding (9%) and provision of drugs, diagnostics and commodities (6%).

### Contribution to the Global Plan to Stop TB

- Partners contribute to the Global Plan mostly through implementation: DOTS expansion (27%), TB-HIV (23%) and MDR-TB activities (13%) and less through research. Only 14% of partners work towards new drugs (4%), new vaccines (3%) and new diagnostics (7%).

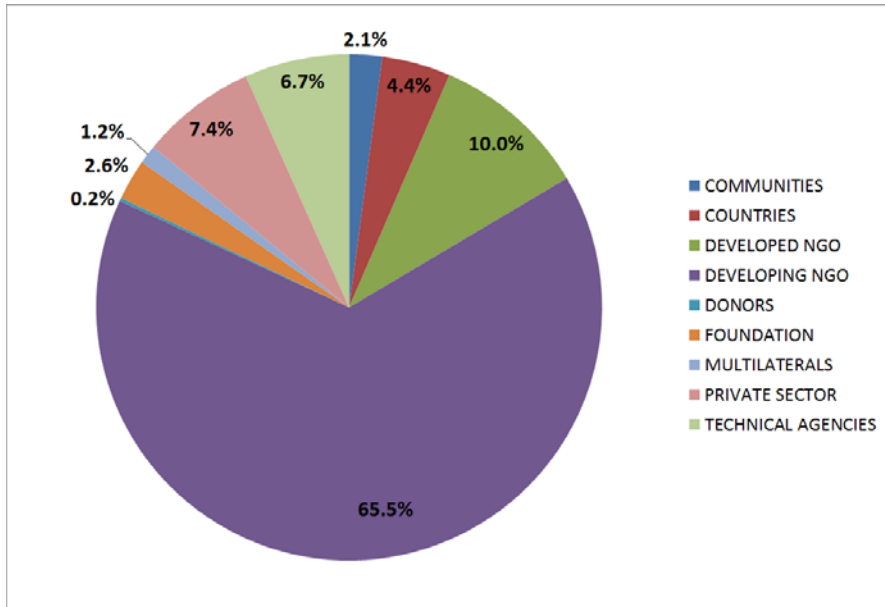

### Reason for joining

- Partners want to be part of the Partnership movement. The most common reasons for joining is involvement in Stop TB Working Groups and other initiatives (38%), network with other partners (26%) and information on developments within the TB world (16%).
- Partners aren't that interested in receiving resources from the Partnership. The least mentioned reasons for joining are technical assistance and advice (8%) and resource mobilization (8%).

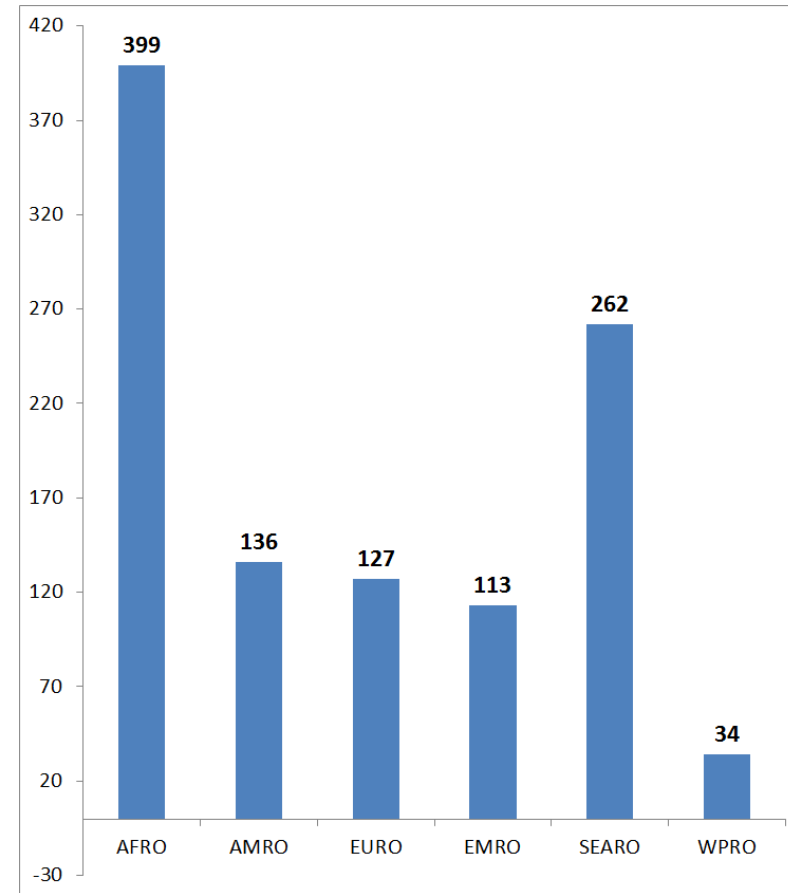

For more details, please see the graphs at pg. 7 and 8.

# DEVELOPED COUNTRY NON-GOVERNMENTAL ORGANIZATIONS

## HIGHLIGHTS

The Developed Country NGO constituency accounts for around 10% of Stop TB Partnership partners: there are 107 partner organizations belonging to this constituency, spread over all 6 WHO-defined regions, based in over twenty-five countries.

### Geographical distribution

Most organizations are based in the AMRO and EURO regions which account for ≈81% of all Developed Country NGOs partners, whereas the EMRO and SEARO regions only account for ≈5%, as they only present 5 organizations in total. The constituency is mostly composed of organizations headquartered in the United States of America, that alone account for nearly half of all organizations.

### Specialization

Partners of this constituency are mainly involved in Advocacy, Communication, Social Mobilization & Community Engagement (30.7%). The specializations that are least represented are Funding and Provision of Drugs, Diagnostics & Commodities that respectively account for 15.2% and 7.3% of all specializations.

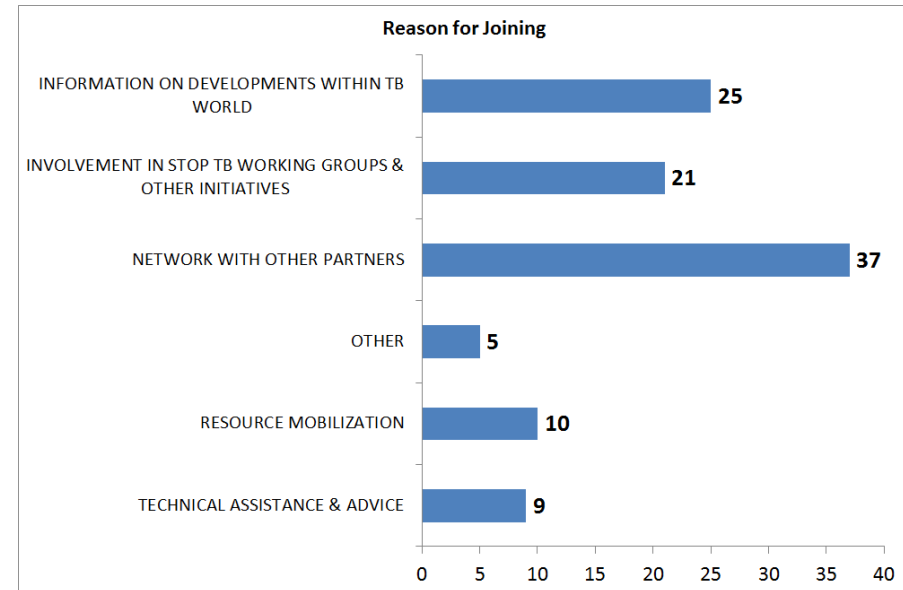

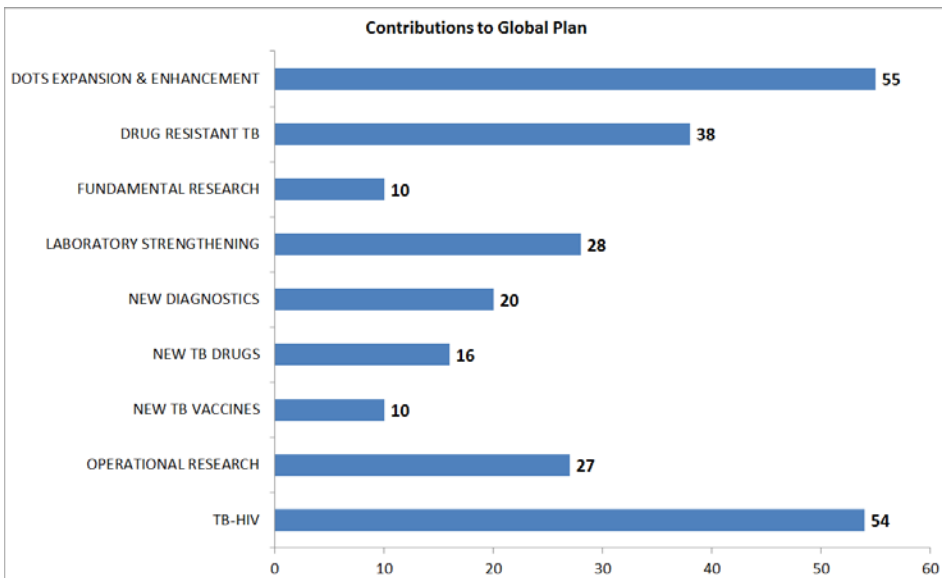

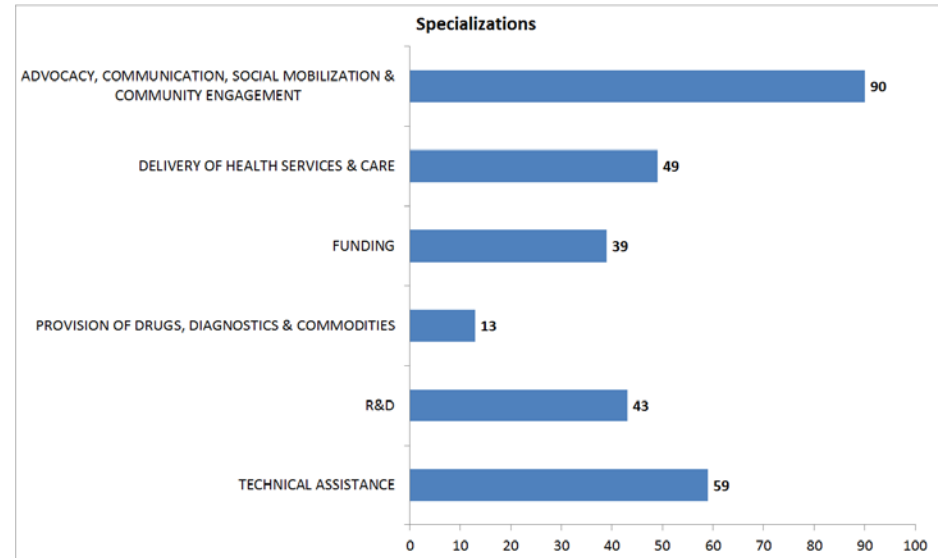

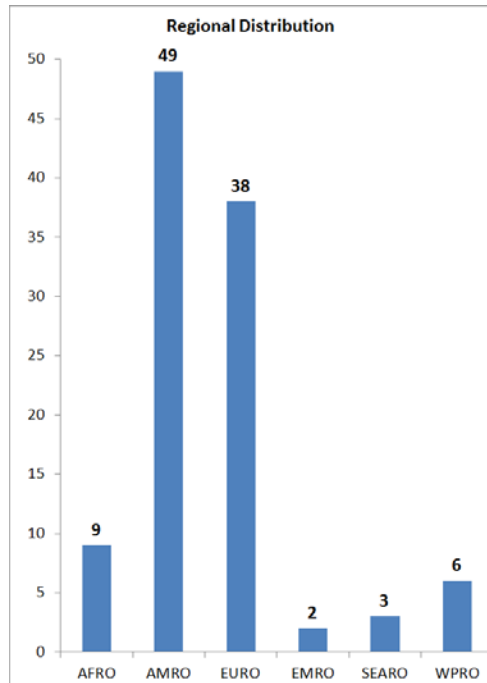

### Contribution to the Global Plan to Stop TB

≈20% partners of this constituency contribute to the Global Plan through DOTS Expansion & Enhancement or TB-HIV. On the other hand, the least selected contributions are to Fundamental Research and New TB Vaccines, that each account for only 3.9% of all contributions.

### Reason for joining

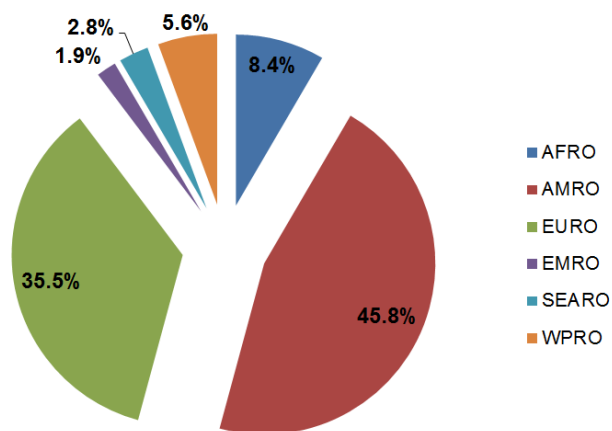

More than a third of all organizations belonging to this constituency claim that their main reason for joining the Partnership is to seek Network with Other Partners (34.6%). The second most claimed reason for joining is for Information on Developments within the TB World (23.4%). The reason for joining which is the least referred to is Technical Assistance & Advice (8.4%).

# DEVELOPING COUNTRY NON-GOVERNMENTAL ORGANIZATIONS

## HIGHLIGHTS

The Developing Country NGO constituency accounts for the most organizations: it counts 701, spread over all 6 WHO-defined regions, across more than 50 countries, with the majority based in low- and middle-income countries.

### Geographical distribution

Almost half of all organizations belonging to this constituency are found in the AFRO region, with Nigeria alone accounting for 15% of all organizations. On the other hand, the SEARO region counts 217 organizations (31% of the total), with India accounting for 25% of all organizations in this constituency. Together, the AMRO, EURO and WPRO regions account for ≈9% of all organizations in this constituency. Even though the EURO region does not count an exceptional number of organizations compared to other regions, 10 countries are represented.

### Specializations

Partners in this constituency are mainly involved with Advocacy, Communication, Social Mobilization & Community Engagement and Delivery of Health Services & Care, that respectively account for 33.5% and 22.5% of all contributions. On the other hand, only 13.5% of all contributions are in Provision of Drugs, Diagnostics & Commodities or Funding.

### Contribution to the Global Plan

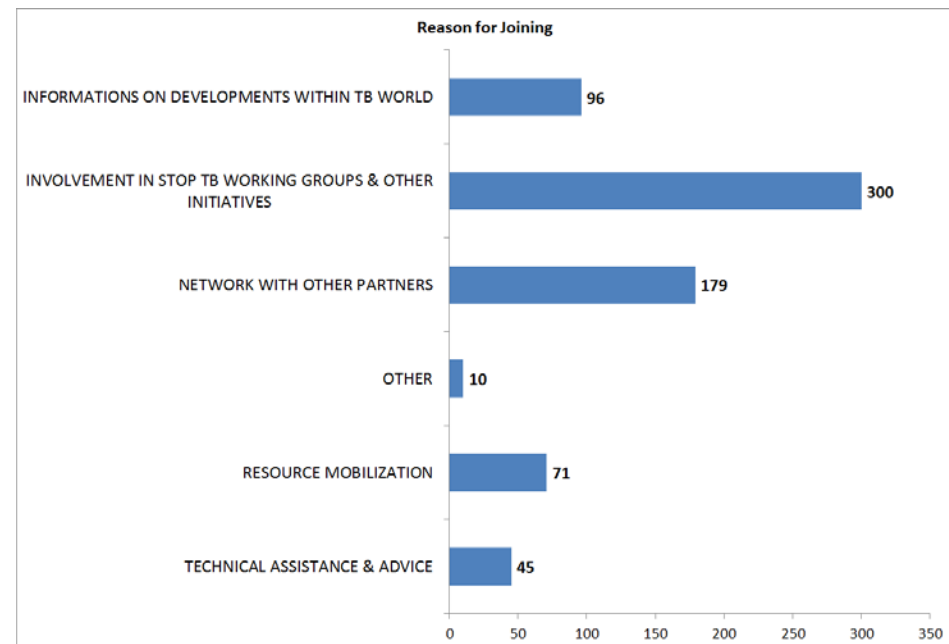

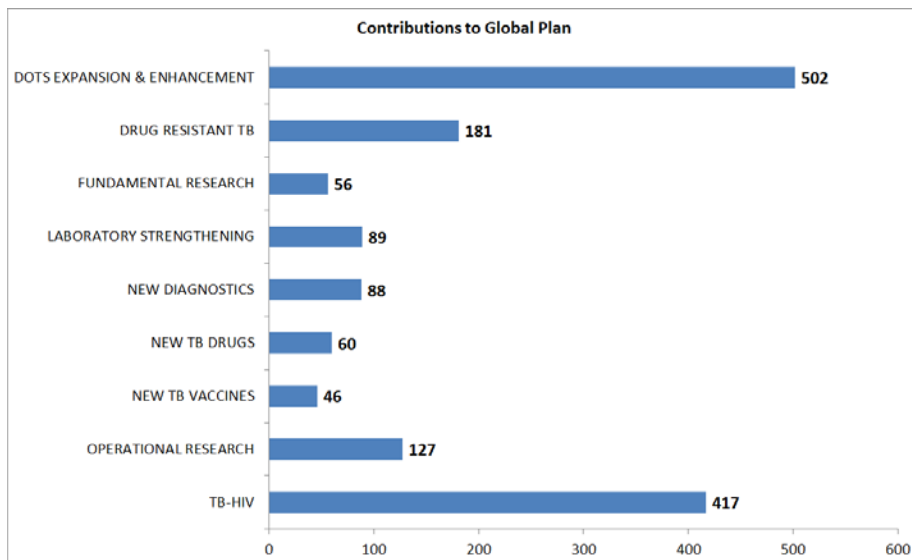

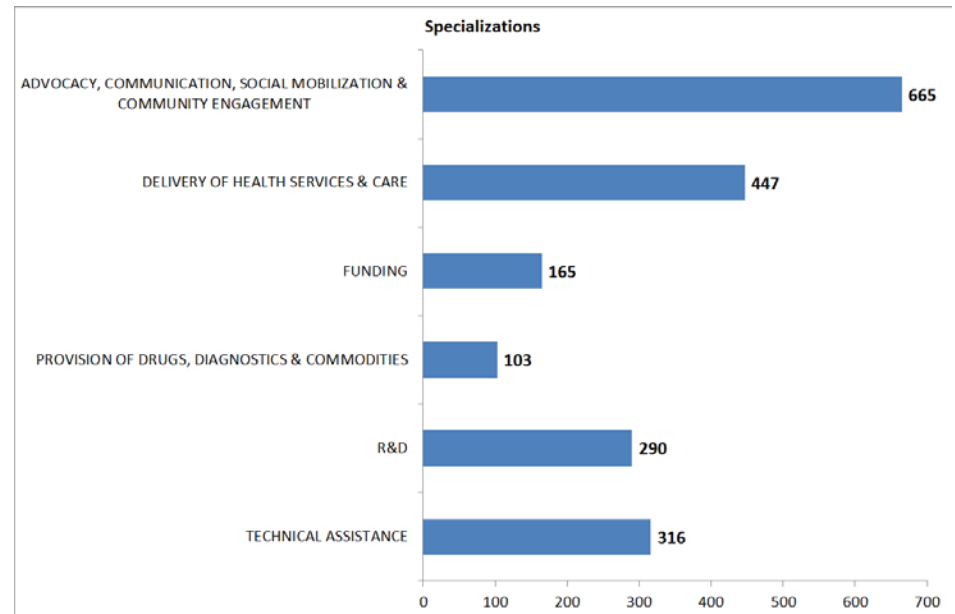

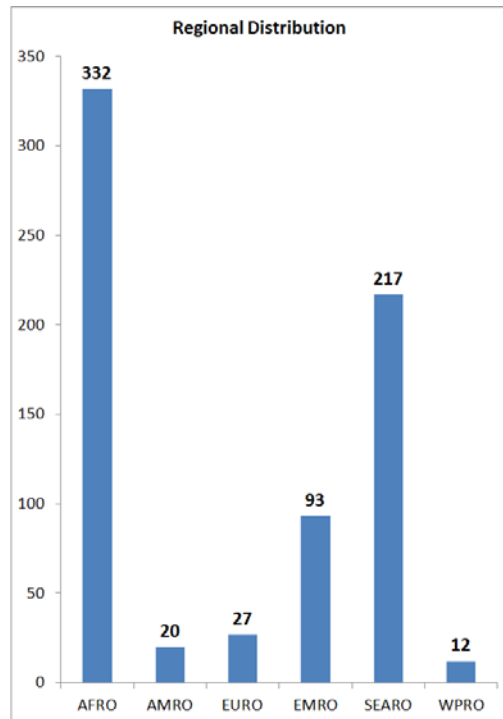

Just less than a third of all contributions selected by organizations belonging to this constituency is in **DOTS Expansion & Enhancement**, whereas 26.6% of all contributions are in **TB-HIV**. On the other hand, the contributions that organizations are involved with the least include **Fundamental Research** and **New TB Vaccines**, respectively 3.6% and 2.9% of all contributions.

### Reason for joining

More than 40% of all organizations in this constituency claim that their main reason for joining the Partnership is to seek **Involvement in Stop TB Working Groups & other Initiatives**, whereas, the second most reported reason for joining the Partnership is to seek **Network with Partners** (25.5%). The reason for joining which is the least referred to is **Technical Assistance & Advice** (only 6.4%).

# PRIVATE SECTOR

## HIGHLIGHTS

There are 79 organizations belonging to the Private Sector constituency which spread over all 6 WHO-defined regions, crossing almost thirty countries. This number is still minimal if we consider the total number of countries that are taken into account: in fact, organizations belonging to this constituency are present in 30 out of 194 countries analyzed meaning that Private Sector organizations cover only 15% of all the countries taken into account.

### Geographical distribution

Both the AMRO and EURO regions present the same number of organizations: each respectively accounts for 30.4% of the total number of organizations in this constituency. By far the country that presents the most number of Private Sector organizations is the United States of America that counts 20 organizations; the second and third most represented countries are India (14 organizations) and the United Kingdom (8 organizations). On the other hand, the EMRO and WPRO regions are those that present the least number of organizations in the Private Sector constituency as they account together for only 11.4%. Interestingly, the SEARO region counts only one country home to Private Sector organizations, India (17.7%).

### Specialization

Partners of this constituency are mostly involved in Advocacy, Communication, Social Mobilization & Community Engagement (18.7%). More or less all of the specializations are covered by organizations in the Private Sector constituency: the specialization that organizations are least involved in is Funding: only 15 organizations out of the total 79 are involved in this (7.4%).

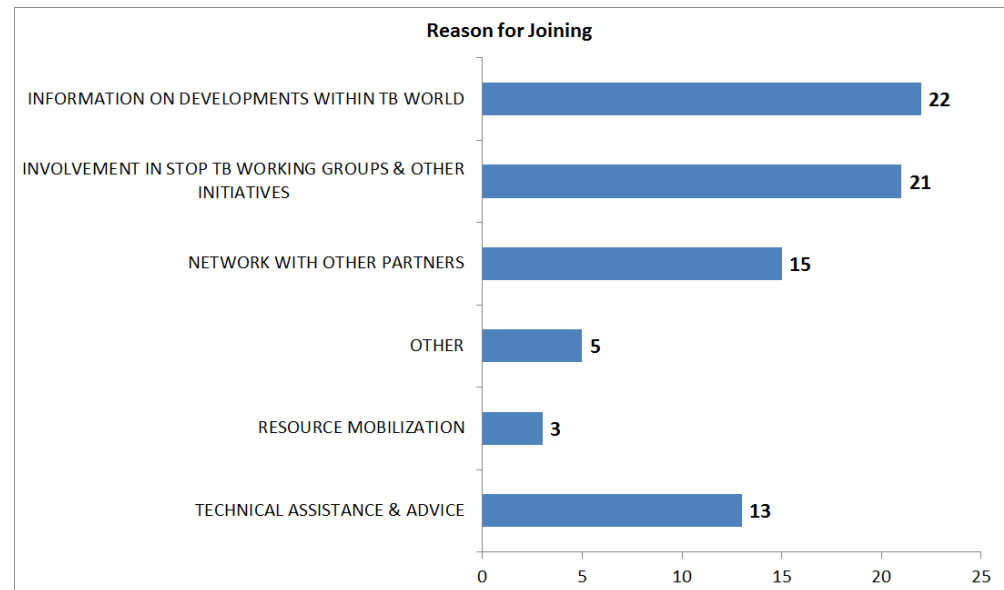

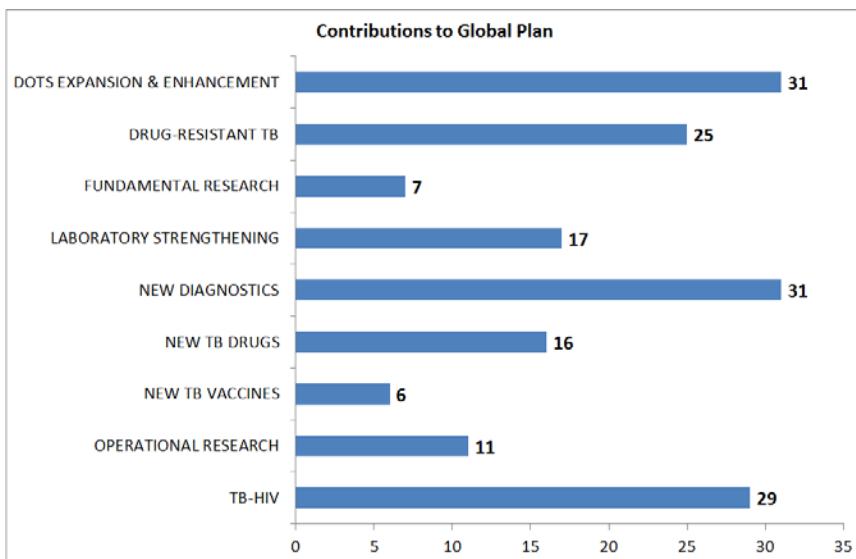

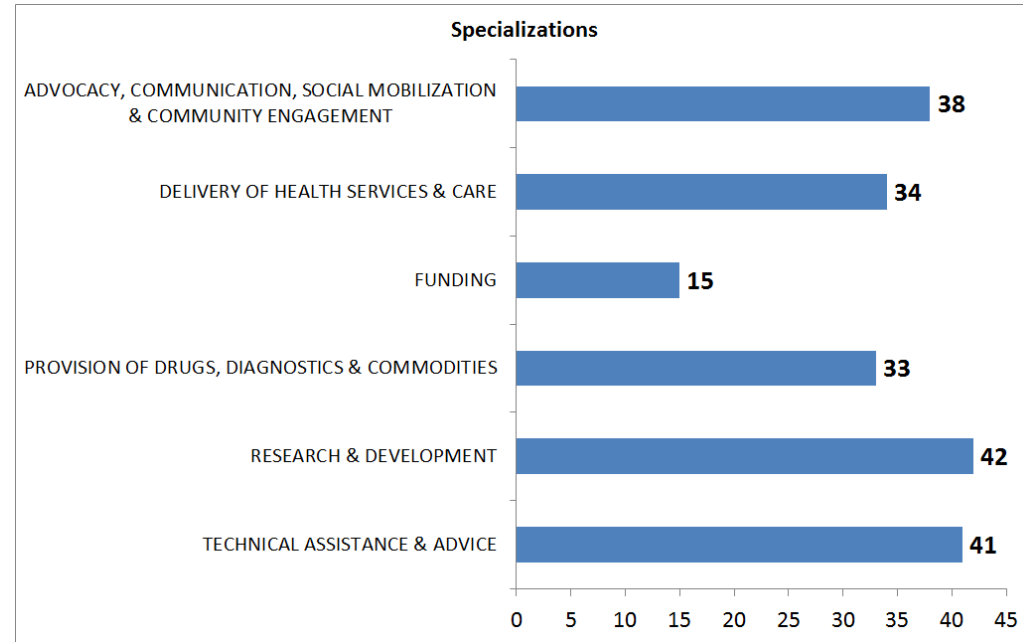

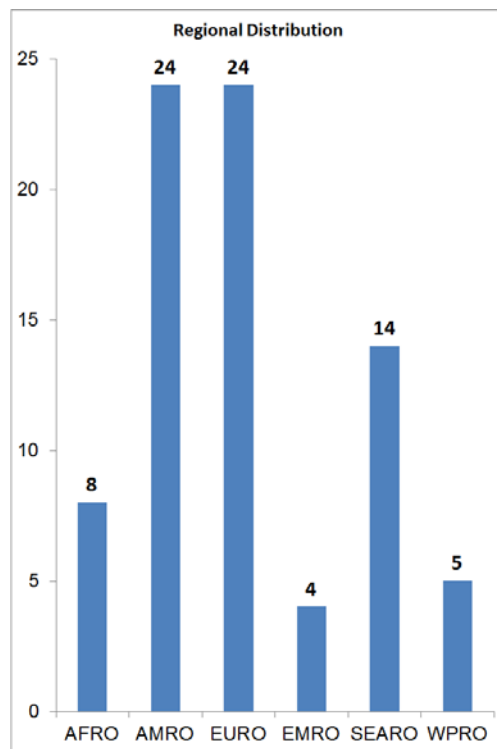

### Contribution to the Global Plan

The contributions to the Global Plan that organizations belonging to this constituency are involved with the most includes DOTS Expansion and Enhancement and New Diagnostics: each respectively accounts for 17.9% of all contributions. The next most selected contribution is TB-HIV (16.8%) followed closely by Drug-Resistant TB (14.5%). Finally, partners contribute the least through New TB Vaccines, only 3.5%.

### Reason for joining

Information on Developments in the TB World and Involvement in Stop TB Working Groups & other Initiatives were the reasons that tallied the most, respectively 27.8% and 26.6% of all answers. On the other hand, Resource Mobilization is the least quoted reason for joining the Partnership with only 3 organizations expressing it as an interest.

# TECHNICAL AGENCIES

## HIGHLIGHTS

The organizations that belong to the Technical Agencies constituency are 72 in total and these account for 7% of the total number of partners. Nevertheless, organizations in this constituency spread over all 6 WHO-defined regions, crossing almost thirty countries.

### Geographical distribution

Both the AFRO and SEARO regions present the same number of organizations belonging to this constituency (15) and each respectively account for 20.8% of the total; however the region that is represented the most is the AMRO region which accounts for 30.6% of all organizations in this constituency. On the other hand, the EMRO and WPRO regions are those that are represented the least (respectively 5.6% and 6.9%) even though they both count more representing countries compared to the SEARO region. Again, the country that counts the most organizations belonging to this constituency is the United States of America with 13 organizations, and India in the second, with 12 organizations.

### Specialization

For the first time in our analysis, Advocacy, Communication, Social Mobilization & Community Engagement is not the most selected as it represents only 16.5% of all specializations. In fact, the most frequent specialization is Research & Development, that accounts for 27.7% of all specializations. Funding and the Provision of Drugs, Diagnostics & Commodities are the specializations that are selected the least, respectively 9.5% and 7%.

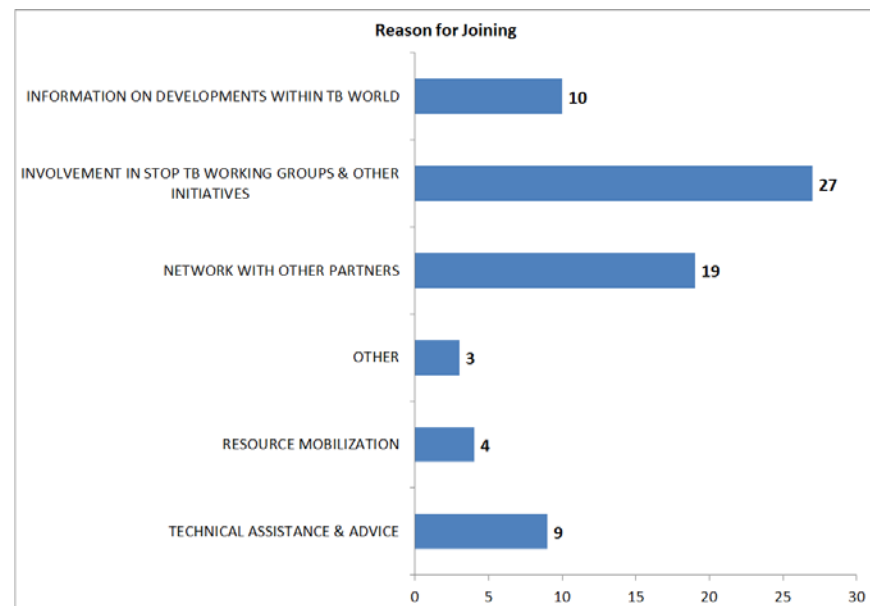

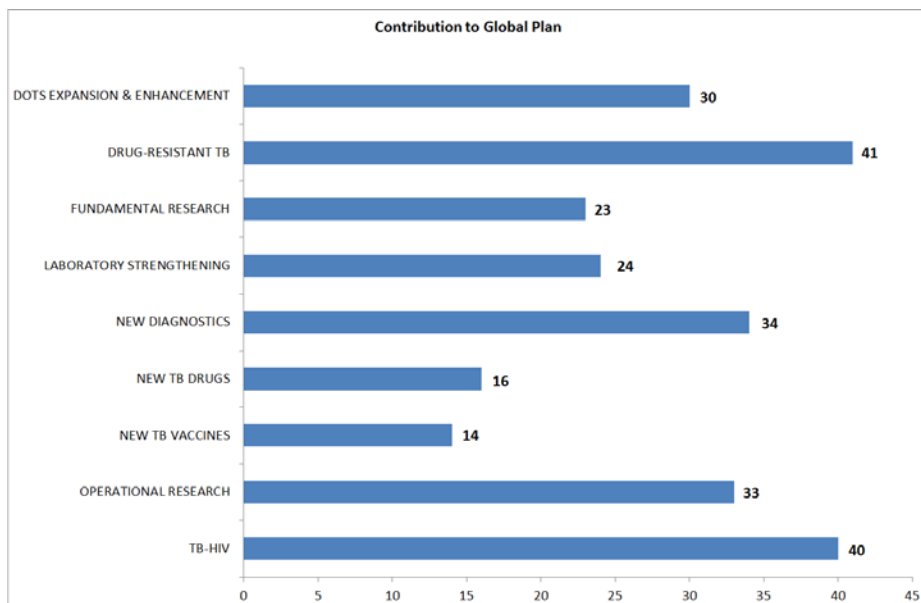

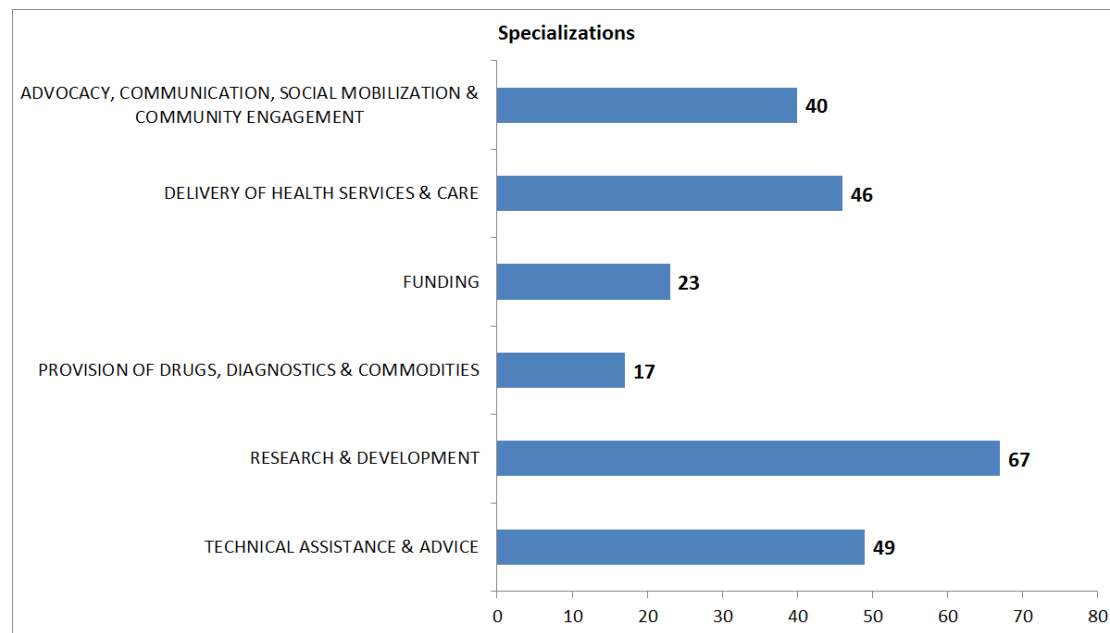

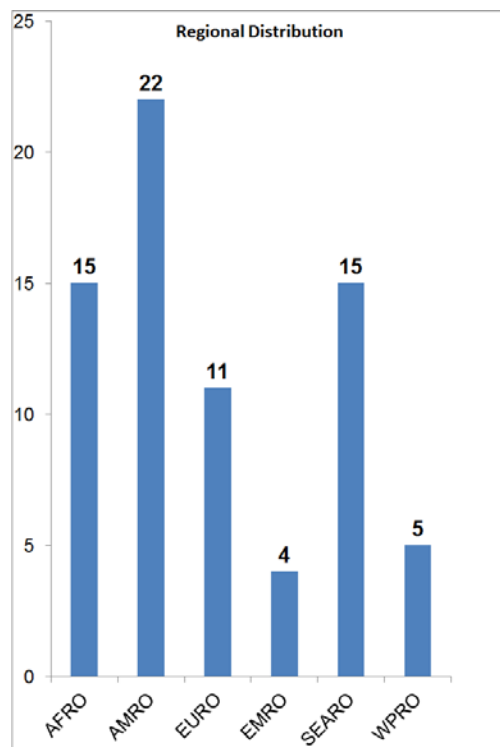

### Contribution to the Global Plan

Similarly to other constituencies, the contribution to the global plan that organizations belonging to this constituency are least involved in involves New TB Vaccines (5.5% of contributions) and New TB Drugs (6.3% of contributions). On the other hand, Drug-Resistant TB and TB-HIV are the contributions that tally the most, together accounting for 31.8% of all listed contributions.

### Reason for joining

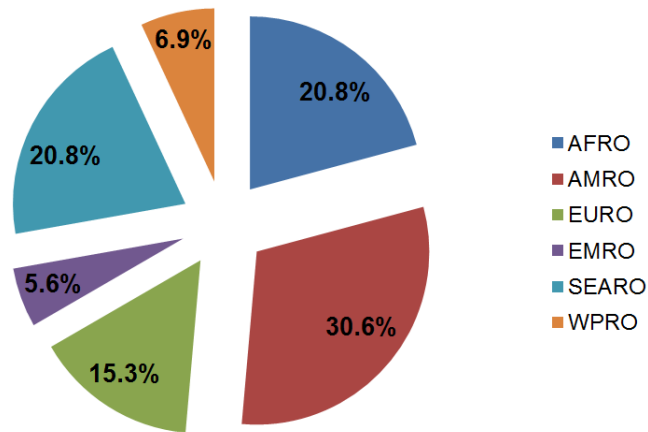

The reason for joining that is given the most regards Involvement in Stop TB Working Groups & other Initiatives (37.5%). Both answers, Information on Developments within the TB World and Technical Assistance & Advice, were given as an answer more or less the same number of times, and together account for 26.4% of all organizations. Once again, Resource Mobilization is the contribution that organizations belonging to this constituency are involved in that tallied the least (5.6%).

# COMMUNITIES

## HIGHLIGHTS

The Communities constituency is amongst the smallest out of all the constituencies: it counts a total of 22 organizations and this, as a fraction of the total number of partners, accounts for just over 2% (22 out of 1079).

### Geographical distribution

The EMRO and WPRO regions present no organizations belonging to the Communities constituency; similarly, the EURO and SEARO regions account for only 2 organizations each. The AFRO region, which accounts for 68.2% of all organizations in this constituency, is represented the most by Kenya and Nigeria (both counting 4 organizations). Lastly, the AMRO region is the region that presents the lowest number of organizations as it accounts for only 3 organizations, 2 in Peru and 1 in El Salvador.

### Specialization

The specialization in Provision of Drugs, Diagnostics and Commodities counts only 1 answer and Funding only counts 4. On the other hand, all organizations belonging to this constituency are involved in Advocacy, Communication, Social Mobilization & Community Engagement.

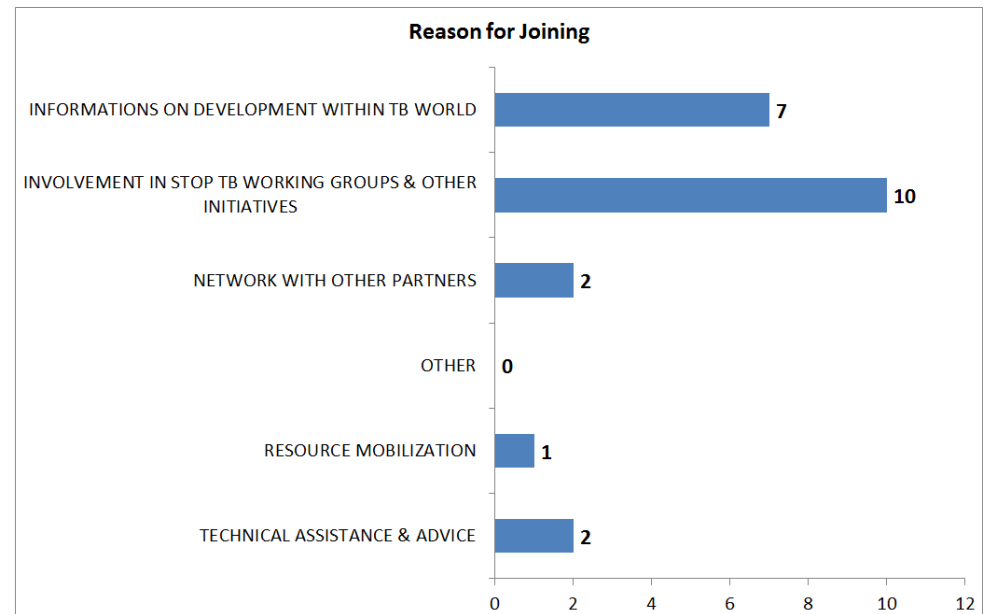

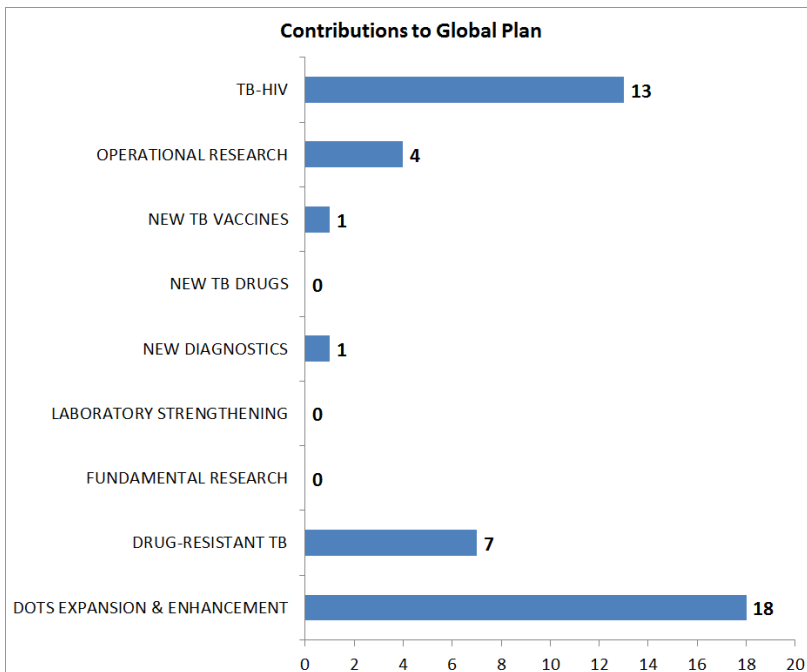

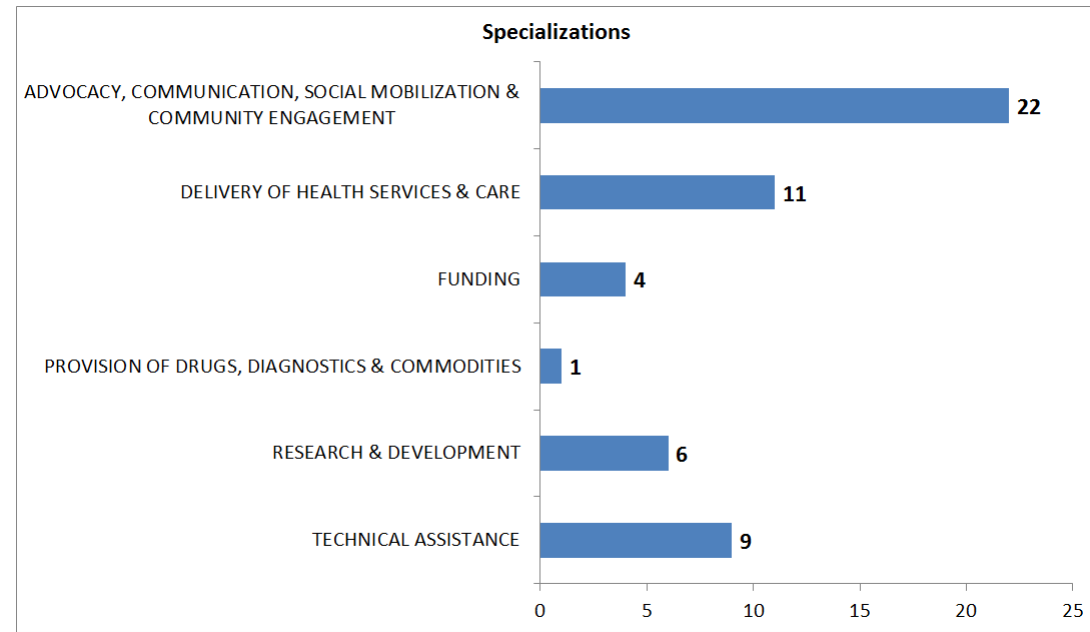

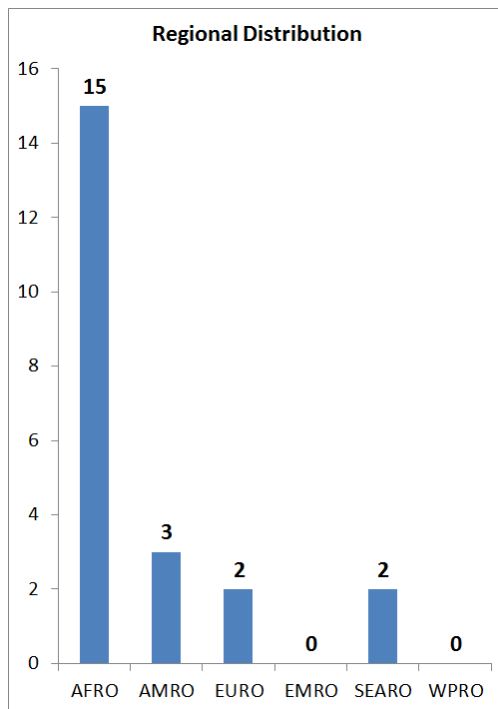

### Contribution to the Global Plan to Stop TB

Organizations in this constituency are not involved in Fundamental Research, Laboratory Strengthening and New TB Drugs at all, with none of the previous specializations being quoted. The contribution in which most partners are involved in is DOTS Expansion and Enhancement (40.9% of answers) and TB-HIV (29.5% of answers).

### Reason for joining

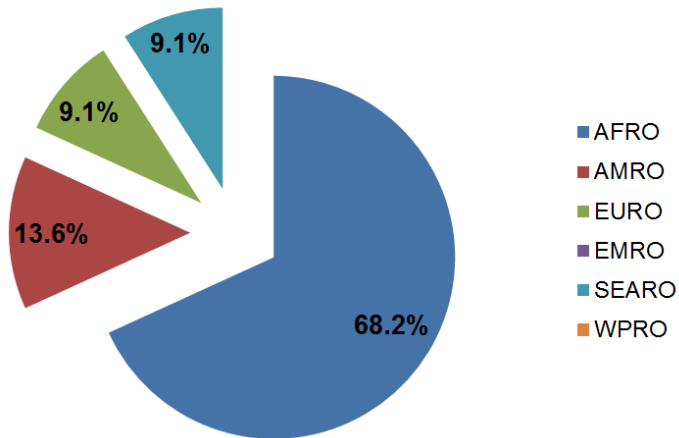

Out of 22 organizations belonging to this constituency, almost half seek Involvement in Stop TB Working Groups & other Initiatives. On the other hand, very few of the organizations belonging to this constituency seek Network with Partners, Resource Mobilization or Technical Assistance & Advice, respectively 9.1%, 4.5% and 9.1%.
