

GLOBAL DRUG FACILITY PRODUCT CATALOGUE

First, second and third line
anti-TB medicines

The Global Drug Facility (GDF) aims to ensure the timely delivery of first- and second-line tuberculosis drugs and diagnostics at sustainable prices.

The benefits of GDF quality-assured products

GDF products enable physicians to treat patients according to the latest WHO treatment guidelines. All GDF products are on the WHO Essential Medicines List, which facilitates registration and importation. The use of Fixed Dose Combination (FDC) tablets greatly contributes to rational drug use and assists in effective implementation and expansion of the STOP TB Strategy. FDC tablets reduce the number of tablets a patient needs to take, while avoiding mono-therapy and thereby reduce the risks of developing Multidrug-Resistant TB (MDR-TB).

GDF has adopted standards for blister design which specify the layout, materials, markings and colour coding that should be used. These blister packs offer the same shelf life as loose drugs at similar or lower costs, help health workers identify the drugs needed, provide better protection for the tablets once the container is opened and can be used in all situations and health facilities.

FIRST LINE ANTI-TUBERCULOSIS MEDICINES

Oral solid dosage forms: Fixed Dose Combinations for adults

PRODUCT	DESCRIPTION	PRICE EXW (USD)
4FDC/RHZE 150/75/400/275 (blister)	Rifampicin 150 mg / Isoniazid 75 mg / Pyrazinamide 400 mg / Ethambutol 275 mg film-coated tablets. PVC/Alu film blister pack of 28 tablets x 24 blisters	43.70

PRODUCT	DESCRIPTION	PRICE EXW (USD)
Streptomycin 1 g inj (vial)	Streptomycin 1 g powder for injection. 100 vials in a box	68.00

Pre-shipment inspection is conducted on all orders by an international agency, independent of the manufacturer, to verify the shipment documentation, quantity and integrity of products, labelling and expiry dates. Randomized sampling and testing is conducted by an accredited laboratory to ensure that batches comply with established quality specifications.

GDF is able to achieve very competitive prices for quality assured products through competitive bidding and bulk procurement. Prices listed indicate the base cost of the product and do not include costs for procurement agent fees, quality control, pre-shipment inspection, transport (air freight or sea freight) or insurance. Prices are provided for indicative purposes only and are based on the highest price offered for a product by a contracted supplier. It is noted that for many products, GDF has multiple suppliers and cheaper prices may be available upon a request for quotation, in addition to consolidation of orders and bulk quantity discounts.

SECOND LINE ANTI-TUBERCULOSIS MEDICINES

Oral solid dosage forms: Fluoroquinolones

PRODUCT	DESCRIPTION	PRICE EXW (USD)
Ofloxacin 200 mg (blister)	Ofloxacin 200 mg film-coated tablets. PvC/Alu film blister pack of 10 tablets / 10 blisters in a carton box	5.00
