USG Global TB Strategy: 2015 - 2019

A World Free of TB

Long term outcomes
Reduce TB incidence rate by 90% by 2035
Reduce TB mortality rate by 95% by 2035

Medium term outcomes
During 2015-2019:
Reduce TB incidence rate by 25%
Maintain treatment success rate 90%
Successfully treat 13 million patients
Initiate treatment for 360,000 DR-TB patients
Provide ART for 100% of TB/HIV patients

Objectives

- Improve access to high quality, TB, DR-TB, & TB/HIV services
- Prevent transmission and disease progression
- Strengthen TB service delivery platforms
- Accelerate research and innovation
National Action Plan For Combating Multidrug-Resistant Tuberculosis
By 2016
- Initiate appropriate treatment in 25% of patients with MDR-TB in 10 countries with the highest burdens of MDR-TB

By 2018
- Initiate appropriate treatment in 35% of patients with MDR-TB in 10 countries with the highest burdens of MDR-TB

By 2020
- Reduce by 15% the number of cases of MDR-TB in the United States
- Initiate appropriate treatment in 50% of patients with MDR-TB in 10 countries with the highest burdens of MDR-TB
- Reduce global TB incidence by 25% compared to 2015 levels
- Successfully treat at least 16 million TB patients in high-burden countries
- Achieve and maintain treatment success rates of 90% for individuals in high-burden countries with drug-susceptible TB
The National Action Plan and achievement of its goals and objectives will depend on close collaboration with domestic and global partners in the fight against TB, including:

- Ministries of Health
- WHO
- Stop TB Partnership
- Global Fund to Fight AIDS, Tuberculosis and Malaria
- U.S. and global front-line health-care providers
- State and local public-health departments
- Non-governmental organizations
- Private-sector organizations
- Community leaders, patient engagement organizations
- Civil society
- TB survivors and other private citizens
- You
THANK YOU
