

The Union's course on Principles of Tuberculosis Care and Prevention: Translating Knowledge to Action

13-22 February 2017, New Delhi, India

Application Deadline: 9 January 2017

<http://www.unioncourses.org/principles-of-tuberculosis-care-and-prevention-translating-knowledge-to-action-3>

Previously known as the International Tuberculosis Course, this course has been developed to drive the way towards tuberculosis (TB) elimination. Health professionals need to understand the principles of TB care, control and prevention and require the skills to manage patients and work with National Tuberculosis Programmes.

Course Objectives:

- To understand the bacteriological and epidemiological basis of effective tuberculosis patient care and programme management
- To understand transmission of TB bacilli and pathogenesis of tuberculosis
- To understand diagnosis and treatment of TB infection and disease, including drug-resistant tuberculosis
- To record, report, analyse and use data on TB case finding and treatment for decision-making at all levels of healthcare
- To work collaboratively with various healthcare programmes and providers to further strengthen quality patient care and programme management

Who Should Attend:

This course is designed for specialists, medical and clinical officers, nurses, laboratory technicians, monitoring and evaluation officers, TB and HIV/AIDS, and non-communicable diseases and tobacco control programme staff and health policy and decision makers, who are primarily working in low- and middle-income countries.

Course Fee: 2,000 Euros

This fee includes tuition and training course materials, accommodation for 11 nights, breakfast with each night hotel stay and lunch for each training course day and field trip transportation.

Language: English

Accreditation:

Clinical and Operational Management Course participants are eligible to earn continuing education units (CEUs) and continuing medical education (CMEs). The Clinical and Operational Management Courses are accredited by both the International Association for Continuing Education and Training (IACET) and the European Board for Accreditation in Pneumology (EBAP).
