WHO WE ARE

The Stop TB Partnership is a unique international body, which is a part of the United Nations family, that aligns all actors over the world to End TB.

The Stop TB Partnership ensures a voice for the TB community at the highest levels.

Various programmes identify and fund innovative approaches to find, treat and cure people affected by TB, including diagnostic and medicines, and united and empowered people affected by TB, civil society, and communities by giving them a voice, platform, stability and capacity.

The Stop TB Partnership unites over 1500 partners and leads global advocacy in the fight to End TB by 2030.

Stop TB mobilized millions of people through our annual World TB Day campaign and other events, achieving major reductions in the prices of TB diagnostics and medicines, and united and empowered people affected by TB, civil society, and communities by giving them a voice, platform, stability and capacity.

The Global Plan to End TB 2016-2020 drives our work to put TB higher on the political agenda, mobilize resources, and create a paradigm shift in the global TB movement.

STRENGTHENING COMMUNITIES

People affected by TB and the grassroots organizations must be at the heart of all efforts to end TB. The Stop TB Partnership focuses on the following areas of work: Challenge Facility for Civil Society (CFCS) grant programme ensuring TB programs are centered on human rights, gender sensitive interventions, and stigma reduction; increasing access of key and vulnerable populations to quality TB services; and investing in strengthening community systems and engagement in global, regional and national platforms.

TB is the world’s leading infectious disease killer

GLOBAL DRUG FACILITY

The Global Drug Facility (GDF) is a multi-lateral funding mechanism which pays for testing innovative new TB medicines and diagnostics across the globe. GDF combines strategic partnerships and investments in supply chains and product development.

TB REACH

TB REACH is a multi-lateral funding mechanism which pays for testing innovative new TB treatments and diagnostics. TB REACH brings together the global public and private sectors to address the needs of the most underserved populations.

PARTNERING WITH THE PRIVATE SECTOR

In order that TB REACH and TB REACH can expand their work, it is important that they work closely with the private sector to deliver results. TB REACH and TB REACH must engage with the private sector in order to deliver results.

GLOBAL TB PARTNERSHIP STRUCTURES

The Stop TB Partnership is a multi-stakeholder initiative that brings together governments, civil society organizations, the private sector, academia, and other stakeholders to work together towards the goal of ending TB.

KEY ACHIEVEMENTS
