

It's
TIME
TO END TB

Help Us End the World's Biggest Infectious Killer

Dear

**No one should die of a curable
airborne disease.**

Tuberculosis (TB) is now the **world's leading infectious killer** claiming **1.5 million lives every year - that's three people a minute.** Yet it remains neglected and ignored.

In 2018 world leaders at the United Nations agreed to ambitious targets to diagnose and treat 40 million people with TB by 2022 and eliminate stigma and discrimination.

But progress is slow and we need to act now.

Will you help us fight TB?
