 - A day and a half conference at World TB day;
 - Parliamentarian breakfast;
 - Inviting CIDA minister to announce activities in support of TB.
 - some action to protect TB funding when commitments made to AIDS
 - Coalition of NGOs Prof orgs, academics, civil society, RESULTS
- Constraints
No funding

Please give us a brief description of your National Coordination Activities (ICC, CCM, Partnership)¹

See above

What are the best practices of your National Coordination Activities up till now?

Annual meeting has been most effective- this year will be held with North American Region of IUATLD in Vancouver and will increase the audience

¹ **Interagency Coordination Committee (ICC)** is a coalition of committed partners and donors directly connected to the performance of the NTP only. **Partnership** is a broad platform of partners in support of a much wider national response to Stop TB. **Country Coordinating Mechanism (CCM)** is a management coordination structure that includes all partners committed to implement a GFATM plan.

Current technical and financial partners that support the DOTS implementation and expansion in Canada
