

The Global Partnership
to Stop TB

Conceptual Framework for GFATM Application

How can countries include advocacy,
communication and social mobilization
activities in their application?

Thad Pennas, Stop TB Partnership Secretariat

Overview

- What is the Global Fund (GFATM) and how does it work?
- The process and procedures

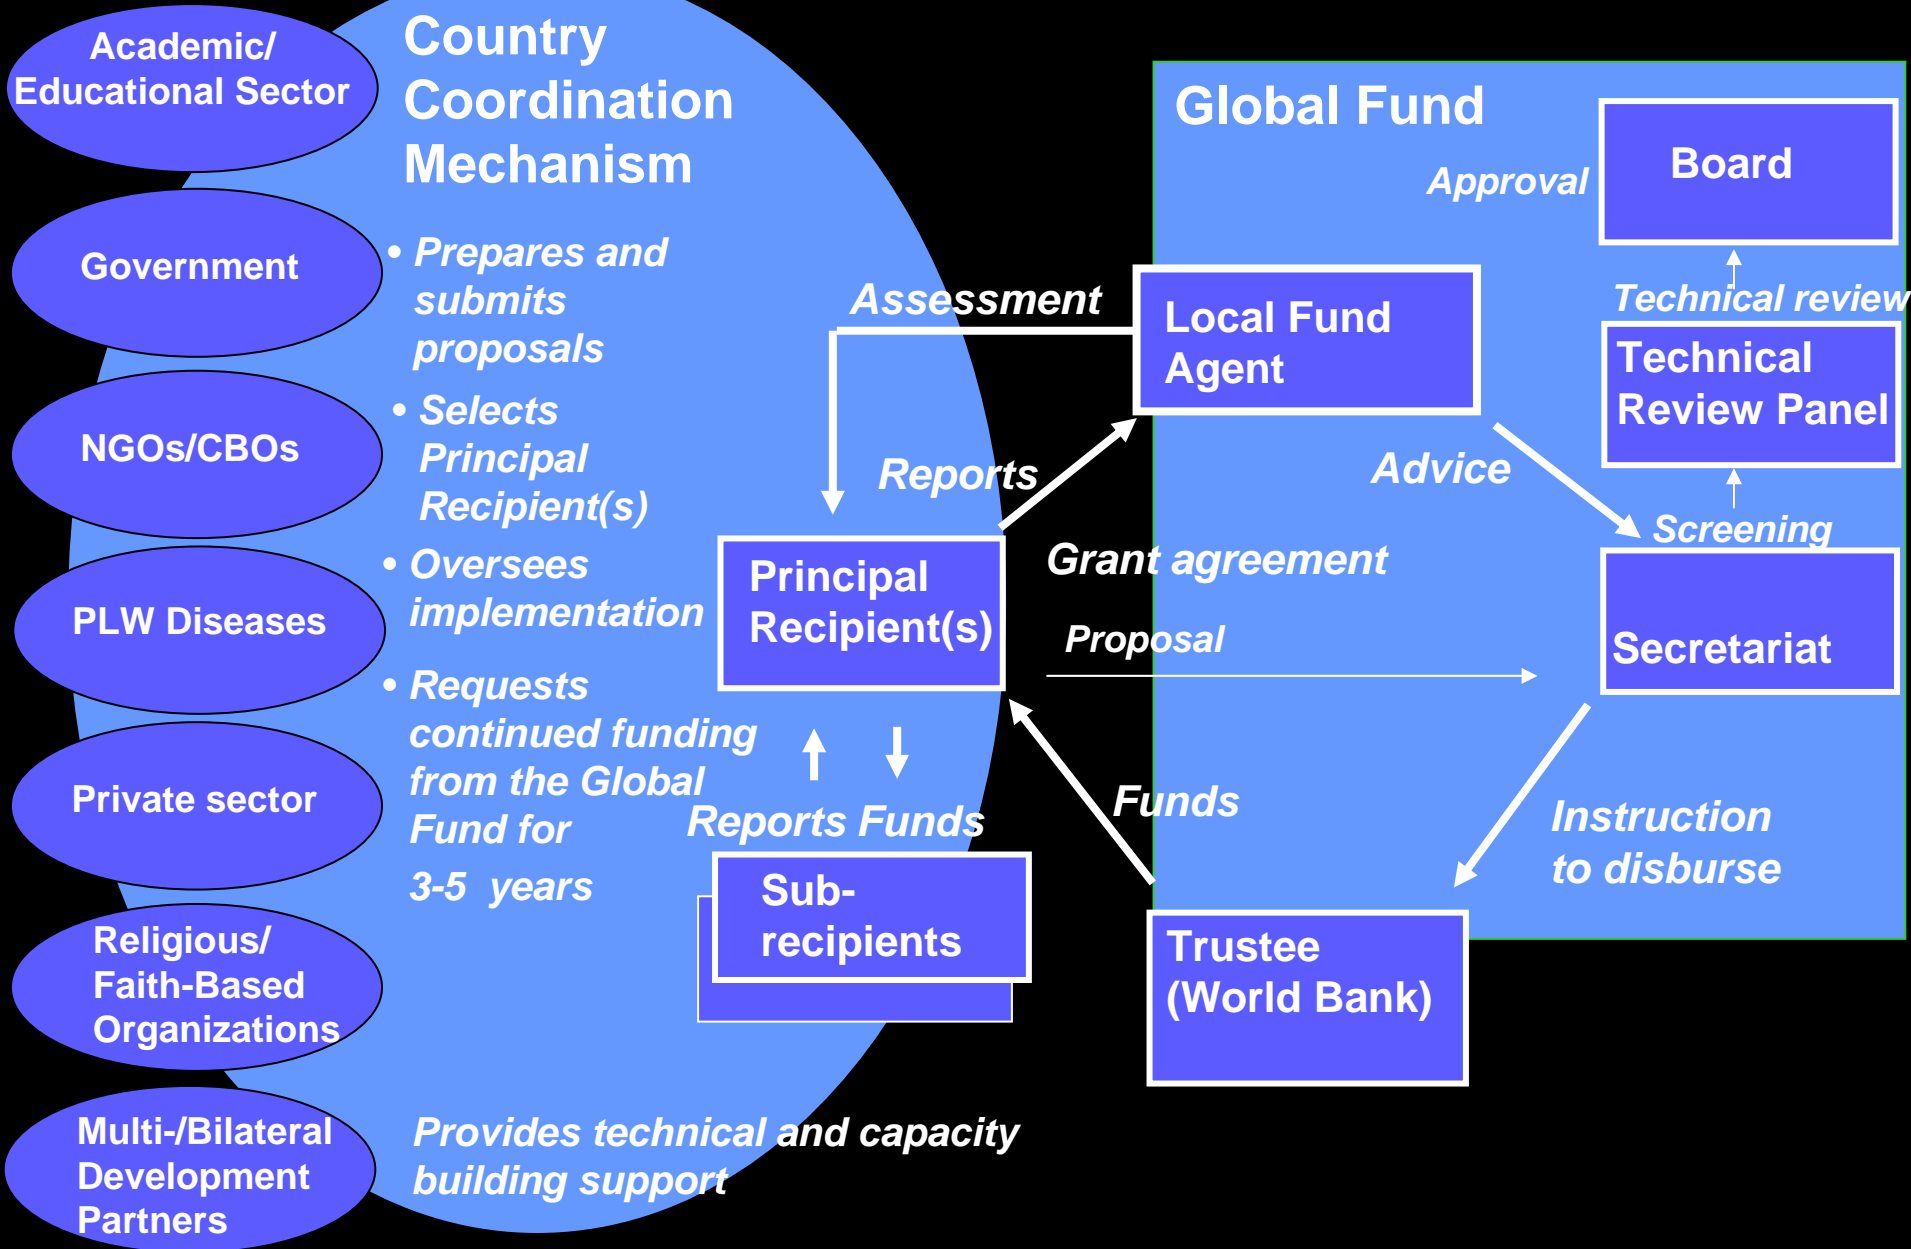

The Global Fund

- A new global **finance initiative** to provide additional funding as grants to fight AIDS, TB and Malaria
- It wants to finance **RESULTS** and **IMPACT**
- GFATM works with eligible countries mainly through Country Coordination Mechanisms (CCM)

Global Fund provides grant money for measurable results

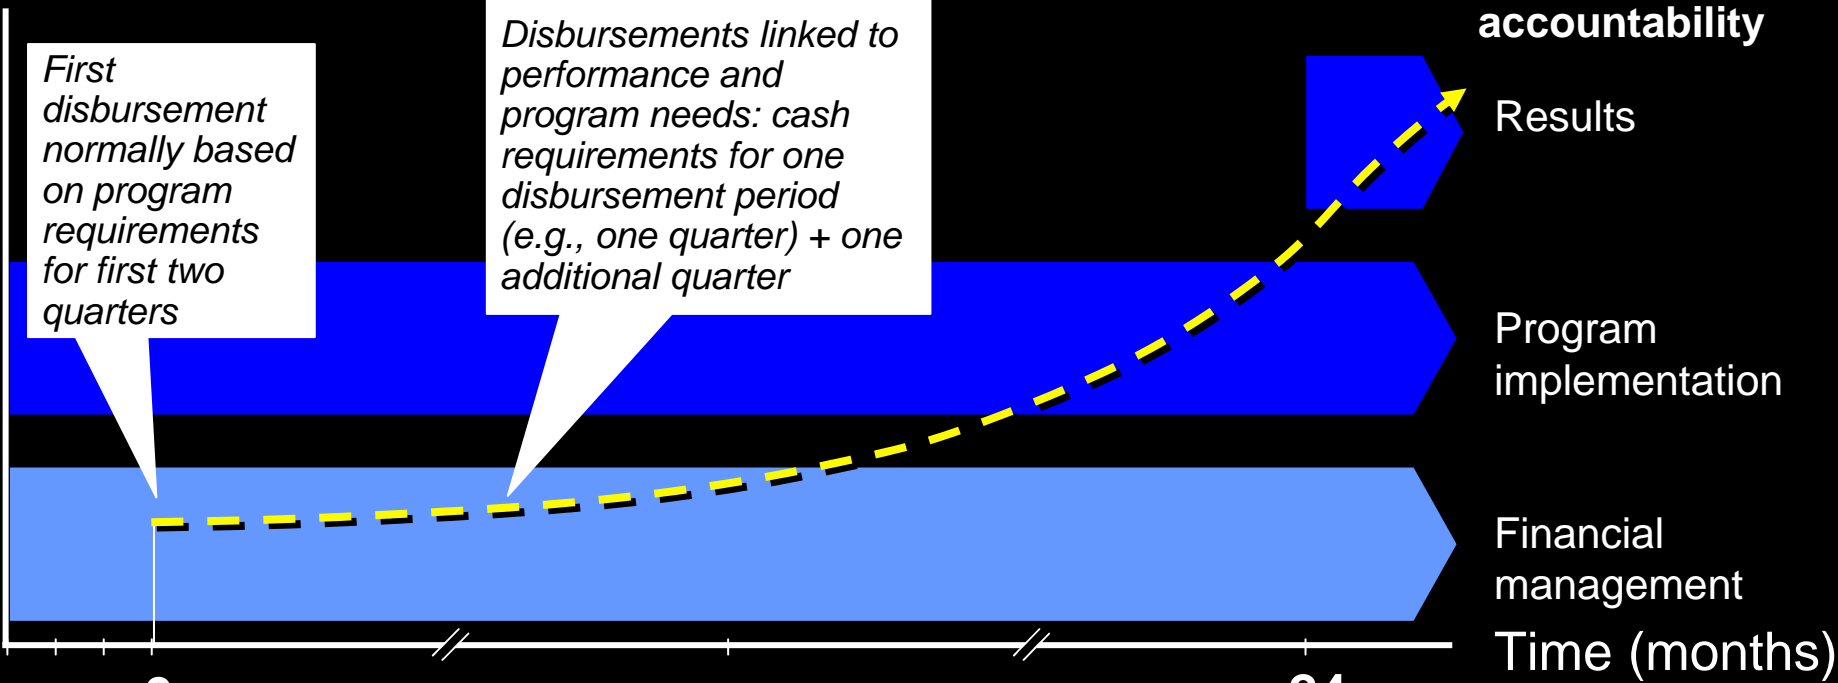

There are multiple partners to the Global Fund's grant program arrangements

During implementation, the Global Fund disburses tranches of the grant based on program need and performance

**Total amount disbursed to grantee
USD**

Disbursements linked to program performance and accountability

Board approval
Grant Agreement

Disbursement Requests and Progress Updates from PRs and advice from LFA trigger disbursements

Global Fund decides on continued funding based on review of performance & financial accountability

GFATM: process and procedures

How does it work?

- **A good CCM is the vital starting point**
- GFATM recommendations and requirements
 - Assess what is feasible and realistic
 - Build on existing coordination mechanisms
 - Explain deviations from GFATM standard
 - Ensure transparency
 - Ensure full documentation
 - Ensure full participation of all stakeholders
 - Keep donors involved or at least informed

The Global Partnership
to Stop TB

THANK YOU

END OF GFATM OVERVIEW

Q&A

***Next up : What does the GFATM
want?***
