

CHALLENGE FACILITY FOR CIVIL SOCIETY

Community based monitoring response to catalyse patient centred care for vulnerable rural population in Gaza Province

LOCATION Chongoene, Chibuto, Bilene and Chokwé districts of Gaza province

TARGET POPULATION(S) 600 newly diagnosed TB patients from the MISAU/WB/ADPP implemented project

IMPLEMENTERS AND PARTNERS ADPP

Associação Mocambicana para a Ajuda de Desenvolvimento de Povo para Povo (ADPP)

Mozambique

ABOUT THE PROJECT

PROBLEM STATEMENT – The project seeks to address barriers (human rights issues) that hamper the accessibility, availability, acceptability and quality of TB services faced by TB patients, by empowering TB patients with knowledge in TB, and to participate in the improvement of the TB services.

AIM – To catalyze a transition to people centered care in TB through increased community and civil society leadership and participation in the TB response in Mozambique.

OBJECTIVES

- 1 To deploy and promote OnelImpact community-led monitoring digital platform and intervention in Gaza province.
- 2 To use and enhance the accountability framework in Gaza province.

STRATEGIC ALIGNMENTS

CONTRIBUTION TO REACHING KEY UN HLM TARGETS BY 2022. The project will contribute to reaching key targets by 2022, because, it advocates what is stated in the UN Political Declaration in pillars: 14, 17, 18 and 19. It prioritizes people centered approaches, non-discriminatory treatment, sensitive to sociocultural barriers, as well as promoting access to affordable medicines.

ALIGNMENT WITH NATIONAL PRIORITIES AND THE TB STRATEGIC PLAN. The former national TB strategic plan that ended in 2019 did not give specific reference to CRG, however the new one, whose development is underway, has envisaged the component of CRG as part of the community engagement.
