## WACI Health

## Anglophone Africa

## ABOUT THE PROJECT

**PROBLEM STATEMENT** — In the wake of COVID 19 there has been an ever increasing need to empower civil society and community voices to advocate for accountability of governments in achieving the UNHLM commitments and targets.

**AIM** — RUN4TB will catalyze community and civil society voices for TB advocacy in the African region to create a sense of urgency, and in a coordinated approach call upon African leadership to rise up for TB by prioritizing the delivery of the UNHLM targets and TB accountability. In addition to this our project aims at working with tb affected communities to elevate CRG responses in TB programs.

### OBJECTIVES

- 1 Strengthen civil society and community voice and action on UNHLM targets and TB accountability.
- 2 Engage political leadership to strengthen commitments on TB HLM targets and TB accountability.

## STRATEGIC ALIGNMENTS

**CONTRIBUTION TO REACHING KEY UN HLM TARGETS BY 2022.** The core strategic objectives of the advocacy campaign is to amplify the civil society and community voice and to engage policy makers on UNHLM commitments and TB accountability.

**ALIGNMENT WITH NATIONAL PRIORITIES AND THE TB STRATEGIC PLAN.** Country partners are working closely with their various national tuberculosis programs and program managers on UNHLM commitments and TB accountability.

# CHALLENGE FACILITY FOR CIVIL SOCIETY

## ABOUT WACI HEALTH

WACI Health is an Africa regional advocacy organization, which influences political priorities through an effective, evidence-driven Pan-African civil society voice and action. We are champions for health striving to ensure equitable access to healthcare for all in Africa. Our strategic approach, as outlined in our strategic plan (2016-2021), include three core strategies: policy and advocacy; strengthening southern advocacy; and civil society engagement in key decision-making processes. Our theory of change is dynamic and interactive, with our three core strategies working together to impact three areas of global health work: (1) increased resources for health; (2) policies that improve health and achieve equity in health; (3) accountability in health governance and delivery.
