		Angola Botswana Equatorial Guinea Gabon Georgia Guyana Malaysia Marshall Islands Namibia# Peru South Africa§ Thailand Tuvalu
		Remaining Countries included in WHO's high TB, TB/HIV and/or MDR-TB burden countries lists ²
		Azerbaijan Belarus Brazil China Kazakhstan Russian Federation

‡ Applicants from the countries eligible with restrictions must provide a justification in their proposal that activities will target: Areas with low TB case detection or poor treatment outcomes, poor populations (poverty pockets), and/or people with limited access to existing TB care services.

§ Global Fund's Catalytic Funding focus countries. Applicants from these 12 countries are encouraged to submit proposals that link to, inform or support their countries' case detection/notification activities funded under their Global Fund grants. Please read this dedicated [information note to understand how TB REACH funding should be linked to Global Fund Catalytic Funding on 'finding the missing cases'](#).

Countries with costed Public-Private Mix (PPM) action plans. Applicants from these 11 countries are encouraged to refer to their national PPM action plan when developing new modules to systematically involve private providers to deliver high-quality TB care. Please read a dedicated concept note on [engaging private healthcare providers](#).
