

Challenge Facility for Civil Society Round 8

Grantee Profile

YKI Indonesia

Reducing TB self-stigma in Jakarta

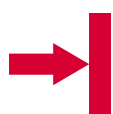

Organisation	Yayasan KNCV Indonesia
Location	Jakarta, Indonesia
Population Reach	25 TB survivors and people with TB in Jakarta
Timeline	May 2018 - May 2019
Contact Person	Dr. Jhon Sugiharto, Executive Director

PROJECT OBJECTIVES

- To deliver, adapt and assess the impact of new self-stigma reduction strategies and interventions among 25 TB survivors and people with TB in Jakarta

PROJECT ACTIVITIES

- Train and support local facilitators to implement the self stigma reduction toolkit among people with TB and TB survivors
- Assess the outcome / impact of the toolkit on self-stigma, shame and related measures among people with TB and TB survivors
- Develop a case study, documenting the process and outcome

Contribution to the Global Plan to End TB target(s)

- Reach at least 90% of all people with TB and place them on appropriate therapy.
- Achieve at least 90% treatment success for all people diagnosed with TB through affordable treatment services, adherence to complete and correct treatment and social support.

Links to National Priorities and the TB Strategic Plan

The project aims to support the realization of NSP Objective 5 "Improvement of the involvement of community in TB control" by increasing the engagement of people with TB, TB Survivors and affected families and communities in the TB response, specifically in case finding and treatment adherence support.

Links to Finding the Missing People with TB

By addressing self-stigma as it relates to TB, the project aims to support people through treatment and their retention in care.

Yayasan KNCV, Indonesia

About Yayasan KNCV

Established in December 2016 and a member of the KNCV Tuberculosis Foundation network, the mission of YKI is to eliminate TB and other related diseases in Indonesia through the development and implementation of effective, efficient and sustainable approaches.

TB in Indonesia

Indonesia ranked 2nd in contributing the highest TB burden in the world with an estimated 1.6 million prevalent cases and 1 million incident cases per year (WHO TB Report, 2017). Multi-drug resistant TB (MDR-TB) is emerging with over 30,000 cases occurring each year, yet only 1,848 (6%) people started treatment in 2016 (The Joint External TB Monitoring Mission – JEMM TB, Indonesia 2017). Indonesia also has the 2nd highest number of estimated cases not reported (690,000) to a National Tuberculosis Programme (NTP) – the so-called “missing cases”. Additionally, the uncontrolled epidemic of HIV is creating as many as 78,000 extra TB cases per year, yet less than 5% of those who are co-infected are found (The Joint External TB Monitoring Mission – JEMM TB, Indonesia 2017).

About CFCS

Stop TB Partnership’s Challenge Facility for Civil Society (CFCS) is a unique small grants mechanism that, since 2007, supports innovative community responses to fight tuberculosis (TB). CFCS over the course of 7 rounds has invested in, tested and demonstrated the effectiveness of community responses to strengthen and expand access to quality TB prevention and care services beyond health facilities to settings that cannot be easily reached by public TB programs - US\$ 3 million (approx.) in investments to 130 grantees in over 40 countries. The Stop TB Partnership looks forward to collaborating with, supporting and learning from CFCS Round 8 grantees.
