

## INVITATION

4 SEPTEMBER 2020

# TB AFFECTED COMMUNITY & CIVIL SOCIETY CONSULTATION ON POST-2021 UNAIDS STRATEGY

UNAIDS is developing a global HIV/AIDS Strategy beyond 2021.

Stop TB Partnership, with the support of the Stop TB Partnership Board Affected Community and Civil Society Delegations, invites you to a consultation of TB civil society and TB affected community to input into the UNAIDS Global Strategy beyond 2021. Because:

- ▶ TB remains the biggest killer of PLHIV and we have a joint obligation to our communities to strengthen TB responses among TB/HIV.
- ▶ We must scale up investments in establishing an enabling environment and inclusive systems for health to overcome barriers to accessing TB/HIV services,
- ▶ We must protect and promote the rights of TB key populations – as those who are marginalized and most vulnerable.
- ▶ We need to work together to achieve the TB preventative therapy among PLHIV target from the UNHLM on TB.
- ▶ Mainstreaming TB screening and testing among PLHIV, including access the most effective diagnostics for PLHIV remains a priority.
- ▶ In light of COVID, there is a pressing need for joint advocacy and joint recovery plans for PLHIV and people affected by TB.

**WE ENCOURAGE YOU TO REGISTER BY 2 SEPTEMBER 9 AM CEST.**

After registering, you will receive a confirmation email containing information about joining the meeting.
