How to move forward with M&E of TB/HIV?

TB/HIV Core Group
New York City April 17, 2008
Riitta Dlodlo
The Key is “Simplicity”

Annex 2, table 2

• Total TB notifications in 2005 and 2006
Revise and adopt revised indicators

- Harmonisation demands give & take
- Let’s view it from perspective of national programmes
  - HCW out there… filling in monthly report form(s)
- Too frequent revision may be counterproductive…
Reduce the HIV burden in TB patients

• Conceptually easy / easier
• Field tested & implemented
• Addition: disaggregate by type of TB
  – new PTB+
  – all types of TB
• Propose: TB treatment outcome analysis by HIV status?
Reduce the TB burden in PLHs

- Way forward – a new start?
  - ICF
- New TB cases diagnosed in PLHs / PLHs registered in ART register
- New TB cases started on TB treatment / New TB cases diagnosed in PLHs
  - IPT
- PLHs started on IPT / PLHs registered in pre-ART register -??
  - TB IC
- New TB cases diagnosed in HCWs / HCWs -?? at sentinel sites
