

# Mozambique Draft 3Is workplan

# Background

- Mozambique is ranking the 16<sup>th</sup> among the 22 high TB burden countries.
- Estimated TB incidence of all forms 409 per 100 000 population/yr (OMS)
- Absolute notifications of all forms of TB continued to increase on average 7% every year since 2005, from 33718 in 2005 to 46141 in 2010 (NTP Report)
- The prevalence of HIV among adult population is 11.5% (Insida 2009).
- More than 60% of patients are co-infected with HIV. (NTP)
  
- TB screening among PLWHA: from 3% in 2008 to 63% in 2010 (NTP)
- IPT among HIV patients: from 724 in 2008 to 13164 in 2010 (NTP)
- HIV C&T among notified TB patients: from 68% in 2007 to 88% in 2010 (NTP)
- TB/HIV patients receiving Cotrimoxazol Prophylaxis: from 93% in 2007 to 97% in 2010 (NTP)
  
- The second Drug Resistance Survey (DRS) conducted in 2007/2008 found that 3.5% of new cases and 11.2% of re-treatment cases had MDR-TB (NTP)

**MOZ Draft Action Plan to scale up the 3Is and ART earlier initiation**

<b>Programme Components</b>	<b>Measurable Objectives</b>	<b>Activities</b>	<b>Indicators for the follow-up (including data collection tools/source of information and reporting system)</b>	<b>Timeline</b>	<b>Responsible Unit&amp;Available resources/support (including civil society)</b>	<b>Budget</b>	<b>Need for further technical assistance</b>	<b>Comments</b>
<b>Universal access to ART for TB/HIV patients</b>	Increase ART coverage of TB/HIV patients notified from 25% to 50% by the first yr and then 80% by the third yr.	Update the ART guidelines on un universal access to ART	ART guidelines updated according to the latest WHO recommendations	Jun-11	HIV Program, TB Program, PMTCT Program and stakeholders (TB/HIV WG)	To be determined the cost of printing addenda and distribution	TA already available	New WHO guidelines recommendation on universal access to ART have been approved but not yet implemented
		Strengthening linkages between TB and HIV Programs and the Central Medical Store (CMAM) to Quantify & Forecasting & Procurement & Distribution drugs	reports from CMAM ??	Jun-11	CMAM in collaboration with TB and HIV Programs	To be determined based on the amount of drugs forecasted	?	
		Training HCW on revised ART guidelines National level (training of trainers)	Number of trainers trained	July-August 2011	HIV and TB Programs	TBD	TA already available	
		Training HCW on revised ART guidelines at Provincial level	Number of HCW trained	Sept-Dec 2011		TBD	TA already available	
		Disseminate the new ART guidelines	revised guidelines are in place at Provincial and District level	July-August 2011	HIV Program, TB Program, PMTCT Program and stakeholders (TB/HIV WG)	TBD	TA already available	

Intensive TB Case Finding & IPT	<p>1. Increase the proportion of HIV enrolled patients screened for TB</p> <p>2. Increase the proportion of PLWHA who receive TB treatment from 8% to 12%</p> <p>3. Increase the number of PLWHA initiated on IPT</p>	Revision and Update of ICF/IPT algorithm and flowchart for adults and for children	ICF/IPT and flowcharts revised and updated		HIV Program, TB Program, PMTCT and Pediatric Programs and stakeholders (TB/HIV WG)	TBD	TA already available	
		Update and harmonize M&E tools on TB/HIV	TB and HIV M&E tools updated and harmonized	Jun-11	TB and HIV Programs	TBD	TA already available	So far only data on TB screening among newly enrolled HIV pts. are collected. New HIV M&E tools will collect indicators on TB screening among all HIV patients in care (last visit)
		Quantification & Forecasting & procurement & distribution of INH	Number of INH stock outs in the reporting period ?	Jun-11	TB Program and HIV Program	TBD	TA already available	
		Training HCW on revised ICF/IPT guidelines and TB/HIV M&E tools at National level (training of trainers)	number of trainers trained	July-August 2011	HIV Program, TB Program, PMTCT Program and stakeholders (TB/HIV WG)	TBD	TA already available	Currently TB screening reported only for newly enrolled HIV pts. However new M&E tools will be able to gather data on TB screening also among the total number of HIV pts. Therefore there is no baseline for TB screening at last visit and the target will be decided in country. IPT currently reported in the total number of HIV patients in care. However, WHO indicators considers IPT only among newly enrolled HIV pts.
		Training HCW on revised ICF/IPT guidelines and TB/HIV M&E tools at Provincial level	number of HCW trained	Sept-Dec 2011	HIV Program, TB Program, PMTCT Program and stakeholders (TB/HIV WG)	TBD	TA already available	joint training on revised ART guidelines and ICF/IPT guidelines
		Disseminate the new ICF/IPT guidelines and TB/HIV M&E tools	revised guidelines are in place at Provincial and District level	July-August 2011		TBD	TA already available	
		mentoring & supervision at field level	number of supervision visits done	July-Dec 2011		TBD	TA already available	

<b>TB Infection Control</b>	reduce the risk of TB transmission in the HC settings	adapt the national IC plan to provincial level	number of Provinces who developed their IC plan	Jun-11	Provincial Infection Control Program with TB and HIV Programs	TBD	TA already available		
		implement TB IC indicators	4 new IC indicators collected and reported		Infection Control Program with TB and HIV Programs	TBD	TA already available	IC indicators have been included in the new HIV Program M&E plan	
		Mobilize funds to expand GeneXpert in the country in order to speed up TB diagnosis					TBD		
		Provide N95 respirators and surgical masks							
		Engage civil society in infection control							
		Intensify IC, ICF and dHIV C&T in prisons and congregate settings							

**Obrigado!**
